

## Global Specialty Aviation Solutions

---

DynCorp International is a global government services provider in support of U.S. national security and foreign policy objectives, delivering support solutions for defense, diplomacy, and international development.

### **TOTAL PROGRAM LIFE CYCLE SOLUTIONS**

DynCorp International provides extensive specialty aviation support for a broad range of U.S. government and state government programs across the globe.

- Counter-Drug
- Law Enforcement
- Counter-Terrorism
- Aerial Firefighting
- Disaster Response
- Energy Infrastructure Security
- Combat Search and Rescue
- Mission-Support Transportation

Working with the Department of State's International Narcotics and Law Enforcement (INL) Office of Aviation, we manage programs that support and execute ongoing operations in Afghanistan, Bolivia, Columbia, Pakistan, and Peru. On a daily basis, our FAA-screened and certified professionals efficiently and effectively execute critical INL missions across the globe. In addition, we maintain and operate tanker planes and other aircraft for the California Department of Forestry, deploying statewide to assist in combating forest fires.

Through continuous innovation and performance improvement – and unsurpassed customer satisfaction – we remain the world’s leading provider of global specialty aviation support services. Company-wide, we provide a broad range of services that can deliver a total mission solution or integrate as needed to fulfill any program’s requirements.

Our elaborate mission infrastructure combines personnel, aircraft, sensors, computers, communications systems, and platforms connected electronically to share information in real or near-real time – regardless of the location or conditions. Every program is self-sustaining, equipped with ample support staff, state-of-the-art materiel resources, and seasoned maintenance, logistics, security, and training experts.

- **Aircraft Maintenance and Modifications**
- **Aircraft, Equipment, and Systems Operations and Training**
- **Vehicle and Ground Support Equipment Maintenance and Modifications**
- **Logistics and Contingency Support**
- **Security Systems and Personnel**
- **Communications and Navigation Systems**
- **Airfield, Camp, and Facility Construction and Operations**
- **IT Installation and Management**
- **Civilian Police Training and Peacekeeping Operations**
- **Weapons Removal and Abatement**
- **Host Nation Skills-Mentoring Programs**
- **Aircrew Training and Standardization**

### **COLUMBIA AIR WING**

In 1991, the United States Congress gave the U.S. Department of State responsibility for an air wing to assist the government Colombia for eradicating illicit coca crops. The State Department chose DynCorp International, and we have held the contract ever since. Carrying out the precise instructions of the governments of Columbia and the United States, we have helped eradicate thousands of acres of illicit crops. As part of this contract, we provide extensive training and employment for Colombian nationals in multiple areas of specialty.

### **CALIFORNIA DEPARTMENT OF FORESTRY**

We apply our extensive experience gained in military aviation and related programs to the task of preventing and combating forest and brush fires throughout the state of California. We deliver full-program support from supplying and maintaining the aircraft to providing seasoned flight crews with the experience and skills to successfully handle these critical missions.

We serve today for a safe tomorrow.™
